## IntelliCAD 7 End-User Beta is released.

**Dear Carlson User,**

We are looking for your input. The IntelliCAD Technology Consortium (ITC) has just released IntelliCAD 7 End-User Beta to a selected group of users. This is a closed Beta program, available through member companies like Carlson to their users by invitation only.

Those of you who are running Carlson 2011 have seen during installation that Carlson 2011 included the earlier beta of IntelliCAD 7.0 for preview and testing. Some of you have installed both 6.6 and 7.0 versions and have been providing invaluable reports of problems, suggestions and feature requests. We hope that these users have noticed that IntelliCAD 7.0 and its integration with Carlson is becoming stronger with each update. In two months that have passed since the last update was issued, IntelliCAD developers have made hundreds of fixes and improvements in preparation for the End-User Beta.

We are currently preparing another update to Carlson 2011. It will include Carlson specific fixes as well as the same revision of IntelliCAD 7.0 as ITC's End-User Beta. Carlson users who install Carlson 2011 with IntelliCAD 7.0 will be able to review and contribute as fully as other IntelliCAD users.

Next time you see an install of update to Carlson 2011 for your IntelliCAD 6.6 (we anticipate this in a week or two), please consider downloading a full install of Carlson 2011 off the Carlson website and installing it with IntelliCAD 7.0 side-by-side with your existing installation.

ITC anticipates this End-User Beta process to last several weeks only, after which the IntelliCAD 7.0 will be released to public. Your feedback is critical at this time. The problems you discover will receive immediate attention by the IntelliCAD team and, while it is too late in the process to make feature enhancements, they, too, will receive close attention and will be queued for further development. This is a great chance for the experienced CAD users to provide direct input and contribute to the tool they use daily.

If you prefer to start right away, before the Carlson 2011 update, or would like to test the IntelliCAD engine by itself without Carlson additions, the invitation to the download of the ITC build of IntelliCAD 7.0 can be requested by emailing Leonid Entov at [entov@carlsonsw.com](mailto:entov@carlsonsw.com). Leonid is also available to answer any questions you may have regarding this invitation.

Thank you for your patronage,  
Carlson Software Team
