Intro to Quantity Takeoffs with Carlson- 8 hours Hands On Training \$249 Call 919.417.8351 to Register by May 8th - Seats are Limited!

This class provides hands on training focusing on the generation of quantity takeoffs with Carlson Takeoff or Carlson Civil.

Some of the topics to be covered are: importing and scaling of image files, generating of volume reports by digitizing or using CAD files for site and road projects.

Please bring your own laptop and mouse. Trial versions of Carlson Civil Suite or Takeoff with IntelliCAD will be provided if needed.

Pre-Requisite: This is an aggressive agenda so a general working knowledge of IntelliCAD or AutoCAD and basic computer knowledge is required of all attendees. The May 16th class, CAD Review and Intro to Carlson Software, may be considered a good primer for this class.
