

Overview of Carlson Software – Scott Griffin

This session will cover many of the standard features of Carlson Survey, Civil and Hydrology along with some of the new features available in Carlson's 2010 release. Some of the features to be presented will be points & surfaces, Field to Finish, Deed Processing, LotNet, Site Stakeout, Site Grading and RoadNet.

Advanced Design & Grading – Scott Griffin

This session will demonstrate how to handle some of the advanced grading & design scenarios using Carlson's Civil program. Roadway designs incorporating ditches, turn lanes and other transition elements will be covered as well as sheet layout for these designs. Grading for a detailed site layout will also be presented.
